

# Calculating Route

1	12					
			14			8
13						
				11	3,15	
4	9					2
	5		10		7	6

In this puzzle, each entry begins in its numbered square and ends in the sequentially next numbered square, except for the last entry, which, if it is the last answer entered, will end in the only remaining empty square. Each entry begins by proceeding in one of eight directions, including diagonals. Divergences are consistently indicated. Enumerations are not provided per clue but appear in the checklist below—for instance, there is only one answer of length (3). Answers include three proper nouns.

**CLUES**
